Did You Know Edition

Did You Know...

Your security system relies on the integrity of your telephone line? If you have had any work done on your telephone wiring or have recently changed your phone service, we highly recommend having us out to guarantee your alarm system is communicating properly. Switching to VOIP service from your local cable TV provider or to Uverse Digital from AT&T, as well as adding DSL Internet may render your alarm system unable to contact the central station.

Call today to schedule an appointment and while we're there, we'll provide a full inspection of your security system.

Did You Know...

We have our own stimulus plan?

Let's face it; things aren't pretty out there. Everyone needs a break here and there. That's why, for a limited time, we're offering quarterly monitoring subscribers who opt into the yearly payment plan, one free month of monitoring. It's our way of putting a few bucks back in your wallet and at the same time, saying thanks for choosing Alltronics Systems, Ltd.

Thanks!

Did you know Alltronics Systems is on the Internet?

Come visit us at www.alltronicssystem.net. There you'll find a host of information on the services we provide, as well as a handy online user manual section where you can view or download a PDF version of your security system instructions. And you can always contact us via email, at mail@alltronicssystem.net. We're just a few clicks away, 24 hours a day.

Did You Know...?

Networking

Wireless networks need security too! We setup and install secure encrypted wireless networks to keep your data and network safe.

Cellular Backup

A faulty or severed phone line means no communication. We can install a cellular backup system to provide peace of mind.

Wireless

A wireless key fob provides the ultimate convenience in security. Arm, disarm, or trip a panic with a single key press.
