## Leave it to us...

**Alltronics Systems, Ltd. is your full service electronics company**

While we remain dedicated to being your number one choice for home and small business security, we also provide a wide range of custom expert installation services to fulfill just about all of your electronic needs. With the cold weather months rapidly approaching, what better way to spend a long winter's night than gathering the family to enjoy the latest blockbuster on your new home theater. We'll professionally mount your flat screen television and connect your sound system, paying special care to aesthetics and concealment in a way the big box stores can't offer! If you're tired of juggling multiple remotes, let us install a universal remote to give you one-button access to all your source equipment. Better yet, use RF control, lose the clutter and move all your equipment out of sight! Just leave it to us...

## Leave it to us...

### Eye In The Sky

Whether you're checking the door or the sound you heard out back, a home camera system is now a smart, affordable choice. DVR based recording is viewable on the big screen or from your laptop while you're on vacation!

### Now Hear This

Tired of bad signals, dead zones and lost calls? If your 3G phone is behaving like a 1G, our cell phone booster can blanket your home or business in a strong signal for voice and cell data. Perfect for smartphones.

### Inside Out

For additional peace of mind, protect your home from the dangers inside. Smoke detectors, heat sensors, sump pump monitors, temp alerts and carbon monoxide detectors can simply be added to your system.

## Going Green

The leaves may be turning, but we're not. Help us save some paper and opt into emailed billing. We'll even take it a step further by offering a free month of monitoring for each referral that signs up for our service, because your wallet can always be a little greener too...

Call for details!

## Communication

Your security system relies on the integrity of your telephone line. If you have had any work done on your telephone wiring or have recently changed your phone service to VOIP, or have added DSL, call us to schedule an inspection. If you're thinking about cancelling your home phone service, we've got you covered. Installing our cell communicator to replace your landline connection will keep your alarm talking to central station without a phone line! Whether installed as a primary or backup communicator, you'll never worry about severed phone lines again.

## On The Web

Visit us at on the Internet [www.alltronicssystem.net](http://www.alltronicssystem.net). You'll find a host of information on the services we provide, as well as an online user manual section where you can view or download a PDF version of your security system instructions. Or email us: [mail@alltronicssystem.net](mailto:mail@alltronicssystem.net) Just a few clicks away, 24 hours a day
